### 5. Soldering Conditions:

#### PCB Hole Type

##### 1)Condition for Soldering

2) It should be used not to allow switch's surface temperature to exceed 240°C.

##### 3)Manual Soldering

Soldering Temperature	Max. 350°C
Continuous Soldering	Max. 3sec

##### 4)Precautions in Handling

Care should be exercised so that flux from the upper part of the printed circuit board does not adhere to the switch.

#### THR Type

##### 1)Condition for Soldering

2)The condition mentioned above is the temperature on the Cu foil of PCB surface.

There are where board's temperature greatly differs from switch's surface temperature depending on board's material, size, thickness, etc. Care, therefore, should be used not to allow switch's surface temperature to exceed 260°C.

##### 3)Precautions in Handling

Care should be exercised so that flux from the upper part of the printed circuit board does not adhere to the switch.

6. This item is "ROHS" Compliant
